

## Donkeys at Bunyip in 2012

### Bunyip Show

Donkeys are inquisitive, intelligent and friendly creatures. They were the first equines to be domesticated and have had an association with humans for over 6,000 years. In 2012, for the first time, there will be a display of donkeys at the Bunyip Agricultural Show. Probably we will then have only smaller donkeys, for photographs and petting. Expect to be charmed.

### Donkey Expo

At the Gippsland Donkey Expo two weeks later, on April 15 at the Bunyip Equestrian Grounds, Pound Rd, there will be donkeys of all breeds and sizes – with demonstrations on health, hoof care, clicker training, gear for riding, harness work, trekking. It will be a day to show the many things donkeys can do. Expect to be overwhelmed.

The Donkey Society of Victoria will also be celebrating its 40th Anniversary at this Expo so there will be fun and games for all – all donkey related of course – and there will be a stall with donkey ornaments and paraphernalia. So come along and join us.
